

The Nathaniel Witherell Visitation Guidance per CMS

Per CMS guidance, we encourage resident and patient visitation to **occur outdoors, in pods, the auditorium, solarium or library**. Resident room visits are allowed, but we encourage visitors to meet with their loved ones in the previously mentioned areas based on the following CMS guidelines:

“While taking a person-centered approach and adhering to the core principles of COVID-19 infection prevention, outdoor visitation is preferred even when the resident and visitor are fully vaccinated against COVID-19. Outdoor visits generally pose a lower risk of transmission due to increased space and airflow. Therefore, visits should be held outdoors whenever practicable. “

“If necessary, facilities should consider scheduling visits for a specified length of time to help ensure all residents are able to receive visitors. During indoor visitation, facilities should limit visitor movement in the facility. For example, visitors should not walk around different halls of the facility. Rather, they should go directly to the resident’s room or designated visitation area. Visits for residents who share a room should not be conducted in the resident’s room, if possible. For situations where there is a roommate and the health status of the resident prevents leaving the room, facilities should attempt to enable in-room visitation while adhering to the core principles of COVID-19 infection prevention.”
